The WASTENOT-gram

Exhibit on Mixed Low-Level Waste Reduction in Otowi

Come to the third floor of the Otowi building and check out the poster presentations on mixed low-level waste right at the top of the stairs leading to the cafeteria. Find out about the challenge of minimizing mixed low-level waste, and read about successful projects that Los Alamos National Laboratory has implemented to reduce its generation. This interesting exhibit will be on display today, Thursday, and Friday.

To schedule an environmental evaluation or presentation for your office, please contact Sonja Salzman at 4-0106 or ssalzman@lanl.gov. These recycling office visits are great for safety meetings, brown bag lunches, group meetings, or for any reason at all!
